

Project No. 7
SHEAR LINE
RELOCATION

CLIENT: Dofasco Inc. **LOCATION: Hamilton, Ontario**

The client, Dofasco Inc. wanted to relocate its #5 Shear Line. The project had to be done within a prescribed shut-down period.

Complex formwork and accurate placement of embedded steel had to be completed prior to the construction of new concrete foundations for the line. Continuous quality control was adopted to ensure that the many anchor bolts were placed correctly.

TCE successfully coordinated and installed the massive foundations, pits and walls that were needed to support all the equipment. The work was completed within the project schedule.
